### MANAGEMENT'S DISCUSSION OF FUND PERFORMANCE

The investment strategy of the Tarkio Fund (the "Fund") is to use our criteria to identify companies whose leaders and whose culture can, over time, give them a competitive advantage (including by engaging employees, delighting customers, adapting and innovating, continuously achieving efficiencies, and continually improving in general) through the lens of (1) Humility, Integrity and Trust; (2) Long-Term Focus; (3) Purpose and Passion; (4) Teamwork: Cooperation, Not Competition; (5) Employee Empowerment: Driving Fear Out of the Organization; and (6) Disciplined Capital Allocation. Decisions whether to sell in order to reduce or to eliminate a position depends on whether and to what extent the company's culture and leadership may drift away from our criteria. Otherwise, our intention is to hold through whatever may occur, including short-term economic cycles and geopolitical and macroeconomic events.

As is typically the case, the stock prices of all the companies in the Fund's portfolio were subject to a high degree of volatility throughout the period, just like the rest of the market in general. The market generally gained throughout the first half of the year ending May 31, 2025, followed by a precipitous drop and subsequent recovery. The downs and ups of the Fund generally followed the timing of the overall market throughout the Fund's fiscal year. The Fund's performance during the fiscal year ending May 31, 2025 was 9.68% while the S&P 500® Index was up 13.52% during the same period. The companies with the largest share price increases affecting the Fund's performance during the period were Lumen Technologies (LUMN, +204%), GE Vernova (GEV, +169%), Ciena (CIEN, +66%), and Lumentum (LITE, +66%). The Fund's worst performers over the same period were MillerKnoll (MLKN, -39%), Enovis (ENOV, -38%), Nucor Corporation (NUE, -35%), and Cognex (CGNX, -34%).

We believe that the significant fluctuations of the market and individual stocks during the fiscal year, due to various geopolitical and macroeconomic events, represented reactions to short-term, temporary conditions. In response to those fluctuations, we purchased a substantial amount of additional stock in a number of what we believe to be high quality holdings at prices that we believe will provide significant increased value for the Fund's long-term shareholders (Cognex, Manitowoc (MTW), ATS, Lumen, Columbus McKinnon (CMCO) and International Paper (IP). We believe we are in a better position than ever to continue to build and compound meaningful wealth for our long-term partners/shareholders in the Fund.

We thank you for your investment in the Tarkio Fund.
